Special Update

## SunRun 2016 Updates

### Day 1

Day 1 was spent in Ames visiting various local sponsors including Alliant Energy, Iowa Energy Center, and Technical Services. Between stops, team members test drove the car in the Jack Trice Stadium parking lot at ISU. While driving in the lot, the car began having some electrical issues. Unfortunately, the team was unable to fix the problems before they were set to head to Cedar Rapids.

### Day 2

Day 2 started at Rockwell Collins. Members of the team talked with many employees, including some PRISUM alumni. The team then had the opportunity to take a tour of one of the Rockwell labs. After that, they headed to the Quad City area. Team members talked with some students at Edison Jr. High School in Rock Island, Illinois. They then met with some Girl Scouts from the Bettendorf area.

The team members were unable to fix the electrical issues during the day, but some parts are coming from Ames and members are currently working on the car. They will be up late into the night to get the car running and ready for Day 3 of SunRun 2016.
